

TRIPLE SQUARE RATCHET WRENCHES

ONE WRENCH DOES THE WORK OF MANY.

- Ergonomic handle shapes make work more comfortable. Models 150 and 151 have vinyl grips.
- Reversing control in head.
- Enclosed ratchet mechanism on Models 50, 51; semi-enclosed on Models 150, 151.
- Utilizes Lowell's 50, 51, 150, or 151 handle and Model 94800 socket.
- Florescent orange sockets make the wrenches harder to lose, easier to find.
- Bolt-Thru design lets bolts pass entirely through sockets and arm head so nuts can be secured on any threaded length.
- Triple square wrench with its 3-in-1 socket fits the most common utility pole fasteners: Lag Bolts, "C" Clamps and Suspension Bolts. The 1/2", 5/8" and 3/4" bolts found on these fasteners use 3/4", 1" and 1-1/8" square nuts that the 3-in-1 triple square socket is designed to fit.
- 100% made in USA.

Designed for linemen, these ratcheting wrenches fit the three most common pole fasteners used by telephone and cable companies, and electrical utilities. Guaranteed against defects in material and workmanship for one year.

ORDERING INFORMATION

Model	No.	A	B	C	D	Weight
50	50901	10"	11"	2 1/16"	1 5/16"	2 lb.
