

MADE IN THE USA

100 Series & Crank Handles

Lowell's crank handles are available in steel or plastic, either fixed or revolving. The 100 series wrenches find applications in many machinery adjustment applications.

The gear teeth provide maximum torque for adjusting rollers, slitters, doctor blades, folders, gluers, unwinds, rewinds, and stems.

Handle	Length	Gears	Sizes Available
101	7"	Square	3/8, 1/2, 5/8
