

PRESS RELEASE

Lowell Corporation Announces State-of-the-Art Laser Customizations Now Available to All Clients

WEST BOYLSTON, MA - Lowell Corporation is offering one of the greatest innovations in marking technology in recent years. With its new Keyence 3-Axis Hybrid Laser Marker machine, Lowell Corporation is able to take markings and identifications to the next level. The implementation of a Laser Marker machine into Lowell's production process allows the company to offer a variety of different marking types as an add on service for its clients.

Lowell Engineers Setting Up the Laser Marker Machine

The Laser Machine Hard at Work in Lowell's Production Process

From marking text characters, logos, barcodes, 2D QR and Data Matrix codes, to GSI DataBars and even BMP and JPEG images, Lowell can laser mark the information you need directly onto your favorite 100% made in the USA product, right in West Boylston, Massachusetts. Lowell is running a special trade show promotion where you can purchase a custom laser marked strap wrench at over 50% list price. Visit Lowell Corporation at their next trade show to take advantage of their limited time special offer.
